

SEABOARD MARINE, S&B FILTERS

Helping your marine diesel breathe right.

Premium unit w/ "hi-temp" insert –recommended for all turbocharged engines and extra demanding service. Filter elements are washable up to four or five times.

Custom 3" neck w/ hi-temp elastomeric insert (4BT thru 6BT or other HD applications) 1100 CFM
Part# SB 3.5HT-UAF **\$95 ea or \$175/two**

Custom 4" w/ hi-temp elastomeric insert(All Cummins 6BTA & 6CTA from 250 to 480HP) 1200CFM
Part# SB 4.5HT-UAF **\$95 each or \$175 for two**

Custom sizes for diesels up to 800 Hp/1600 CFM are available (inquire with Tony)

Our QSM filter kits run **\$300** each (**\$600** pair)
This price includes S&H to the lower 48 states.

Our unit can be mounted up, down or sideways. The higher horsepower units have a CCV gas connection on the end, that has been proven on many

commercial high hour applications and is 100% trouble free. Available for both high and low horsepower options. Because our elbow is "soft" it makes for a much nicer "squeeze" by in a tight engine room.

Replacement elements are **\$125** including shipping, so you can see they are a very cost effective alternative to OEM filters.

WET QSM 11
(450 HP or less with)
Part #SBQSM4

Dry Manifold QSM 11
(530 HP and up)
Part #SBQSM5

(Note: There are some early low HP dry QSM-11's)
