

This is our "Envirovent" CCV system. This system is extremely simple, and is the most effective way to go for your Cummins B marine diesel.

If you have any "fit" or installation concerns, all you need to do is send a few pics showing all of the install and we'll sort it out for you.. Our "one-on-one" help for specific application needs is one of the reasons we have set ourselves apart from all the rest. Plus, we learn too by interaction directly with the customers needs, so it becomes a win-win situation.

**\$350**  
or 2 for \$650

Complete as shown per side including a new S&B high Performance air cleaner

Includes UPS shipping to your door in all 48 contiguous states.

- Significantly improves the crankcase breathing system
- Easy to install & maintain
- Customized product solutions designed to meet your specific requirements
- Inexpensive to upgrade from your existing "open breather"
- The Envirovent was designed to be the perfect and simple upgrade replacement for the very troublesome factory supplied Walker System that can cause so much unnecessary grief in any B series Cummins
